

A very unique Honeymoon in the Cloud forest

The Ecuadorian cloud forest is an environmentally friendly area... A 5* ecolodge in the Ecuadorian Cloud forest is the perfect choice for guests who value openness, imagination, simplicity and romance, and who are looking for a secluded and intimate getaway for their honeymoon.

This package is very special, very romantic, and combines luxury and simplicity, nature and gourmet cuisine, spa and aromatherapy treatments... Everywhere you go during your honeymoon you will have a lot of good surprises and everything will be made to make you feel like in paradise.

The ecoresort is located in the north western lowlands of Quito where the majority of these forests have been cleared to develop products such as banana and African Palm Trees. Only few ecological reserves remain including the Mindo-Nambillo cloud forest reserve and other private reserves like Arashá where you will enjoy 4 incredible days. Given the fact that it is on a slope, the sunrays are able to penetrate deeper inside the forest, thus giving place to richer endemic flora and fauna.
